## Skills

**Languages:** C++, C, JavaScript (ES6+), Python, Java, TypeScript, SQL

**Technologies & Tools:** Git & GitHub, MongoDB, MySQL, HTML5, CSS3, Microsoft 365, VS Code, Postman, Firebase

**Frameworks & Libraries:** React, Angular, Node.js, Express.js, Bootstrap, Tailwind CSS

**Concepts:** RESTful APIs, Responsive Web Design, Object-Oriented Programming (OOP), Component-Based Architecture, Role-Based Access Control (RBAC)

## Work Experience

**Vasundhara Infotech, Surat**

Jul 2025 - Present

**Junior MERN Developer**

- Wrote and maintained modular, reusable, and testable code for web applications.
- Worked on API integration, data handling, and feature enhancements across the MERN stack.
- Participated in debugging, troubleshooting, and resolving issues to ensure smooth functionality.
- Contributed to technical documentation, code reviews, and adherence to best practices.

**The Synergizer, Surat**

Mar 2025 – Apr 2025

**Software Developer**

- Built a task management platform with role-based access control (Owner, Manager, Employee) using the MERN stack.
- Implemented secure authentication, role-based task assignment, and dark mode toggle with a scalable React architecture.
- Developed RESTful APIs, optimized MongoDB queries, and maintained version control with Git workflows.

## Internships & Freelancing

**Techrover Solutions Pvt. Ltd., Ahmedabad**

Jan 2024 - May 2024

**Software Development Intern**

- Contributed to frontend development using Angular, HTML, CSS, and TypeScript for responsive web-based products.
- Built reusable UI components, improved performance, and ensured cross-browser/device compatibility.

## Education

**Nirma University, Ahmedabad**

Oct 2020 - May 2024

B.Tech in Electrical Engineering

**CGPA: 7.80/10**

Minor in Computer Science and Engineering

**CGPA: 9.00/10**

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Introduction to Programming, Data Science, Machine Learning, Internet of Things

## Project Work

- **Internet of Things (IoT)-Based Battery Monitoring System (Jan 2024 – May 2024):** Developed an IoT-based battery management system (BMS) to monitor temperature, voltage, and current in rechargeable battery packs. Enabled real-time data reporting via IoT for remote monitoring of battery states and implemented GPS-based alerts for nearby charging stations when State of Charge (SoC) is low. *Technologies: IoT, GPS, Sensors, Embedded Systems*
- **Recipe Web App (Feb 2024 – Mar 2024):** Created a recipe management app using Angular and Firebase. Implemented recipe creation, editing, and storage, along with a shopping list feature. Enabled PDF downloads for shopping lists and secure user authentication via Firebase. *Technologies: Angular, Firebase, HTML, and CSS*
- **Task Management Web App (Jan 2024 – Feb 2024):** Developed a task management application using the Angular framework. Implemented features for task listing, creation, editing, and deletion. Integrated Firebase for real-time storage and synchronization, with user authentication and authorization. *Technologies: Angular, Firebase, HTML, and CSS*
- **Movie Recommender System (Jun 2023 – Jul 2023):** Built a content-based movie recommendation system using cosine similarity on the TMDB 5000 dataset. Performed data preprocessing, developed the model, and deployed it as a web application. *Technologies: Python, Pandas, Scikit-learn, and Flask*

## Awards and Certificates

---

- **Complete Angular 13 Course Step by Step:** Completed comprehensive training covering Angular fundamentals, components, services, and deployment.
- **Data Structures and Algorithms - Self-Paced:** Completed in-depth study of algorithms, data structures, and problem-solving patterns.
- **Programming for Everybody (Getting Started with Python):** Completed an introduction to Python programming, covering syntax, data types, and functions.
